SCHOOL PROJECTS

VIRTUAL DEN: ANDROID ONLINE COMMUNITY APPLICATION FOR THE COLLEGE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY

Capstone project

Role: Leader/One of the programmers (2) /Take parts on writing documentation/ Tester/ Video/powerpoint editor/ Designer

- A mobile application for the college of information and communication technology.
- It has 5 user roles namely student, organization, admin, professor, and dean.
- It is composed of announcements, room utilization, schedules, chat, profile, open letter to the dean, and lost and Found.
- It is like a social media app in where we put together all the needs of our college.

Technologies used: JAVA, Firebase, Android studio

SLAMBOOK APP

School Project

Role: Leader/Programmer/Designer/Demonstrator

- A mobile application for everyone.
- User can post entry composed of image and answers to personal questions.
- It has functionalities to create, read, update, and delete entries.
- It is cross platform; you can use it on mobile or online by the use of API.

Technologies used: **JAVA, PHP, MySQL, CSS, HTML, VSCODE, Android studio**

PERSONAL PROJECTS

Front-end projects I made (Responsive)

- <https://laurencetdg.netlify.app/>
 - The commissioned sketches and paintings by my cousin are displayed on the website. Viewing her completed commissions and contacts are part of it.
- <https://inshape-store.netlify.app/>
 - InShape is an online store for fitness equipment or tools. User can view products and reviews. It includes also some reviews. You may check the physical address of the store along with its contacts and working hours.
- <https://todo-list-now.netlify.app/>
 - TodoList is a straightforward web application created to assist users in entering their to-do lists. The browser stores any entered data.
- <https://checkfood.netlify.app/>
 - Checkfood is a simple calculator for calories intake. User should input food and calorie it has to make it work. The purpose of this application is to warn the user if the target calories on that day was surpassed.

Visit live projects on my portfolio website : <https://icodeix.github.io>

My Github Account: <https://github.com/iCodeIX>

Technologies used: HTML5, CSS3, JAVASCRIPT

Editor: VSCode (Advantage: loving using emmet and shortcuts)

For my **character reference**, you may contact
